Associate Director, Design

Design leader with 6+ years at magicpin, leading a 8-10 member team across consumer, merchant, and rider platforms. I've owned product strategy and execution for 20+ features, driving a 65% lift in monthly transactions, 20% growth in GMV & significantly faster merchant onboarding. Known for bringing clarity to ambiguous problems, I build scalable solutions rooted in user insight while enabling teams to move faster and deliver meaningful business impact.

EXPERIENCE

magicpin — Sept 2019 – Present

India's largest hyperlocal marketplace · Consumer, Merchant & Rider

Associate Director — Jan 2025 – Present

- Grew the design team from 4 → 10 by building hiring pipelines, mentorship structures and career frameworks that retained every designer hired, set and own design vision across all three platforms.
- Architected an end-to-end design system: tokens, components, guidelines, cutting engineering build time 20–30% and unifying the design language across magicpin, magicFleet, and the merchant app.
- Ran cross-functional product sprints with Engineering, Product, and Business, compressed magicFleet feature delivery from 8 → 4 weeks and established the sprint model as the standard for how design ships.

Lead Product Designer — Jan 2024 – Jan 2025

- Drove a full consumer app overhaul, rebuilt onboarding (+40% completion) and discovery (+25% engagement), generating a 65% lift in monthly transactions and +20% GMV within the launch quarter.
- Designed the magicFleet rider app from zero: onboarding, live orders, earnings dashboard, and support, the product now handles 50% of all food delivery orders on platform.
- Built and ran A/B testing across checkout flows; improved cart-to-checkout by 20% and checkout-to-payment by 8-10% through iterative, data-led design decisions.

Senior Product Designer — Jan 2023 – Jan 2024

- Shipped the merchant catalog builder from scratch, cut setup time by 50% and raised catalog quality in the consumer app by 30%, within two months of feature-launch.
- Maintained a 95% on-time launch rate by improving design-to-handoff processes and providing clear, implementation-ready design documentation that reduced back-and-forth with engineering.

Product Designer — Sept 2020 – Jan 2023

- Ran 100+ merchant research sessions (interviews, surveys, field observation), producing insights that directly shaped roadmap decisions for Merchant Portal, Merchant App & other two internal tools (KDM/Sales).
- Built the team's first shared component library, eliminating duplicated design work and standardising brand language across every part of the design team.

Acropolis Infotech — Jul 2019 – Sept 2020

Graphic & UI Designer — Jul 2019 – Sept 2020

- Designed app and web UI, Google ad creatives, and social content across client campaigns, built early foundations in visual hierarchy, interface design, and brand design.

SKILLS & TOOLS

Strategy & Leadership	Product roadmapping · Objectives & Key Role alignment · Data-driven prioritisation · Stakeholder management · Team leadership (scaled 4 → 10)
UX & Design	User research · Usability testing (100+ sessions) · Wire framing · Hi-fidility prototyping · Design systems · A/B testing · Journey mapping · Information architecture
Tools	Figma · Framer · Hotjar · UserTesting · Jira · Figjam · AI-assisted design & development workflows using Claude, Codex, GPT · Exploring implementation with Android Studio and terminal-based workflows

EDUCATION

NIFT, New Delhi	Bachelor of Design, Leather Design	2015 – 2019
St. Joseph's Convent School	I.C.S.E., Science with Mathematics	2010 – 2012
